

Energy Services holds an annual December department luncheon right before the holiday break. Production and Distribution crews generally provide smoked meats and everyone else brings sides and desserts (we do boast some very good cooks). This year the main course was prepared by locally owned Cherokee Strip Barbeque and provided by Frankfurt-Short-Bruza Architectural/Engineering firm from OKC. FSB is the design team for our new Central Plant project and our campus-wide Utilities Master Plan. We meet for the luncheon in our Power Plant with set-up and clean-up handled primarily by our Production staff. Here are a few images from this year's luncheon.

Rick Krysiak, Facilities Management Director (center) speaking to Energy Services staff.

James Rosner, Energy Services Director, speaking with staff before the luncheon.
